Oxidation-sensitive residues mediate the DNA bending abilities of the architectural MC1 protein
Bure, C; Goffinont, S; Delmas, AF; Cadene, M; Culard, F  J. Mol. Biol. (2008) 376 (1) 120-130

Preparation of peptide thioesters using Fmoc strategy through hydroxyl side chain anchoring
Lelièvre, D; Barta, P; Aucagne, V; Delmas, AF  Tetrahedron Lett. (2008) 49 4016-4019

Synergic effect of hydride and proton donors in the Pd(0)-mediated deprotection of N-α-Aloc proline derivatives
Decostaire, IP; Lelievre, D; Aucagne, V; Delmas, AF  Tetrahedron Lett. (2007) 48 6523-6526

Combining a polar resin and a pseudo-proline to optimize the solid-phase synthesis of a ‘difficult sequence’

Controlling the outcome of overacylation of N-protected aminoxyacetic acid during the synthesis of an aminoxy-peptide for chemical ligation
Decostaire, IP; Lelievre, D; Zhang, HH; Delmas, AF  Tetrahedron Lett. (2006) 47 (39) 7057-7060

Identification of isoenzymes using matrix-assisted laser desorption/ionization time-of-flight mass spectrometry

Location and base selectivity on fragmentation of brominated oligodeoxynucleotides
Bure, C; Castaing, B; Lange, C; Delmas, AF  J. Mass Spectr. (2006) 41 (1) 84-90
Modular synthesis and immunological evaluation of MUC-derived glycoproteine antigens
Cremer, GA; Bureaud, N; Lelievre, D; Piller, V; Kunz, H; Piller, F; Delmas, AF  J. Pept. Sci. (2006) 12 100-100 Suppl. S

Synthesis and biological evaluation of a multiantigenic Tn/TF-containing glycopeptide mimic of the tumor-related MUC1 glycoprotein
Cremer, GA; Bureaud, N; Piller, V; Kunz, H; Piller, F; Delmas, AF Chemmedchem (2006) 1 (9) 965-968

Collision-induced dissociation of peptide thioesters: the influence of peptide length on fragmentation
Bure, C; Boujard, O; Bertrand, M; Lange, C; Delmas, AF  Eur. J. Mass Spectrom. (2005) 11 (1) 31-34

Efficient synthesis of C-terminal modified peptide ketones for chemical ligations

Matrix-assisted laser desorption/ionisation mass spectrometry for the direct analysis of enzymatically digested kappa- iota- and hybrid iota/nu-carrageenans
Antonopoulos, A; Hardouin, J; Favetta, P; Helbert, W; Delmas, AF; Lafosse, M Rapid Commun. Mass Sp. (2005) 19 (16) 2217-2226

Fragmentation study of peptide acetics and aldehydes using in-source collision-induced dissociation

Synthesis of branched oxime-linked peptide mimetics of the MUC1 containing a universal T-helper epitope
Cremer, GA; Bureaud, N; Lelievre, D; Piller, V; Piller, F; Delmas, A  Chem.-Eur. J. (2004) 10 (24) 6353-6360

Design and synthesis of a peptide construct from p23 protein using oxime ligation
Lelievre, D; Favard, C; Antonny, B; Chabre, M; Delmas, A Biopolymers (2003) 71 (3) 404-404 Art No. P471

Influence of polar support for the synthesis of large C-terminal peptide aldehyde: application to chemoselective ligation
Lelievre, D; Turpin, O; El Kazzouli, S; Delmas, A Tetrahedron (2002) 58 (27) 5525-5533

The Perseus Exobiology mission on MIR: Behaviour of amino acids and peptides in earth orbit
Boillot, F; Chabin, A; Bure, C; Venet, M; Belsky, A; Bertrand-Urbanjak, M; Delmas, A; Brack, A; Barbier, B Origins Life Evol. B. (2002) 32 (4) 359-385
In-source fragmentation of peptide aldehydes and acetals: influence of peptide length and charge state
Bure, C; Gobert, W; Lelievre, D; Delmas, A J. Mass Spectrom. (2001) 36 (10) 1149-1155

Synthesis of peptide di-aldehyde precursor for stepwise chemoselective ligations via oxime bonds
Lelievre, D; Bure, C; Laot, F; Delmas, A Tetrahedron Lett. (2001) 42 (2) 235-238

Antibacterial and antifungal activities of vasostatin-1, the N-terminal fragment of chromogranin A
Lugardon, K; Raffner, R; Goumon, Y; Corti, A; Delmas, A; Bulet, P; Aunis, D; Metz-Boutigue, MH J. Biol. Chem. (2000) 275 (15) 10745-10753

Identification of by-products from an orthogonal peptide ligation by oxime bonds using mass spectrometry and tandem mass spectrometry

Structural features of a chimeric peptide inducing cytotoxic T lymphocyte responses in saline
Delmotte, C; Le Guern, E; Trudelle, Y; Delmas, A Eur. J. Biochem. (1999) 265 (1) 336-345

Synthesis and fluorescence properties of Oregon Green 514 labeled peptides

Simple and efficient solid-phase synthesis of unprotected peptide aldehyde for peptide segment ligation

Fine specificity of the antibody response to a synthetic peptide from the fusion protein and protection against measles virus-induced encephalitis in a mouse model
Partidos, CD; Ripley, J; Delmas, A; Obeid, OE; Denbury, A; Steward, MW J. Gen. Virol. (1997) 78 3227-3232 Part 12

Structural properties of chimeric peptides containing a T-cell epitope linked to a fusion peptide and their importance for in vivo induction of cytotoxic T-cell responses
Lelievre, D; Hsu, SC; Daubos, P; Favard, C; Vigny, P; Trudelle, Y; Steward, MW; Delmas, A Eur. J. Biochem. (1997) 249 (3) 895-904

Efficient binding to the MHC class I K-D molecule of synthetic peptides in which the anchoring position 2 does not fit the consensus motif
Quesnel, A; Hsu, SC; Delmas, A; Steward, MW; Trudelle, Y; Abastado, JP Febs Lett. (1996) 387 (1) 42-46
High thermal stability and cold-denaturation of an artificial polypeptide
Lacassie, E; Delmas, A; Meunier, C; Sy, D; Trudelle, Y Int. J. Pept. Prot. Res. (1996) 48 (3) 249-258

Linkage of a fusion peptide to a CTL epitope from the nucleoprotein of measles virus enables incorporation into ISCOMs and induction of CTL responses following intranasal immunization
Hsu, SC; Schadeck, EB; Delmas, A; Shaw, M; Steward, MW Vaccine (1996) 14 (12) 1159-1166

Structural requirements for synthetic immunogens to induce measles virus specific CTL responses

The binding of chimeric peptides to GM1 ganglioside enables induction of antibody responses after intranasal immunization
Delmas, A; Partidos, CD Vaccine (1996) 14 (11) 1077-1082

Purification of synthetic peptide libraries by affinity-chromatography using the avidin-biotin system

Influence of the conformation of a macromolecule on the generation of T-cell proliferative response - a study with model polypeptides
Lacassie, E; Delmas, A; Trudelle, Y Febs Lett. (1994) 349 (3) 380-384

Studies of the influence of different cross-linking reagents on the immune-response against a B-epitope
Delmas, A; Brack, A; Trudelle, Y Bioconjugate Chem. (1992) 3 (1) 80-84

Neutralization of cholera-toxin by rat IGA secretory antibodies induced by a free synthetic peptide

Oral immunization with a free peptide from cholera-toxin - local protection and IGA production
Pedoussaut, S; Delmas, A; Milhaud, G; Rivaille, P; Gruaz-Guyon, A Mol. Immunol. (1989) 26 (2) 115-119

A synthetic peptide selected in cholera-toxin sequence is immunogenic orally and induces local protection
Guyon-Gruaz, A; Pedoussaut, S; Delmas, A; Milhaud, G; Rivaille, P J. Cell. Biochem. (1987) 185-185 Suppl. 11B
**Synthesis of a new carrier for immunization - polytuftsin - 2 examples of its use with peptides selected in the hepatitis-B surface-antigen**
Trudelle, Y; Brack, A; Delmas, A; Pedoussaut, S; Rivaille, P Int. J. Pept. Prot. Res. (1987) 30 (1) 54-60

**Oral immunization with a synthetic peptide of cholera toxin-B subunit - obtention of neutralizing antibodies**
Guyon-Gruaz, A; Delmas, A; Pedoussaut, S; Halimi, H; Milhaud, G; Raulais, D; Rivaille, P Eur. J. Biochem. (1986) 159 (3) 525-528

**Epitopes of the 44-68 human parathyroid-hormone fragments - the importance of specific hydrophilic peptide sequences**
Delmas, A; Milhaud, G; Raulais, D; Rivaille, P Mol. Immunol. (1985) 22 (6) 675-679

**Solid-phase synthesis of 2 cholera toxin-B subunit antigens**
