Eckart axis conditions, Gauss’ principle of least constraint, and the optimal superposition of molecular structures

Influence of pressure on the fractional relaxation dynamics in proteins: a simulation study

Solvent effects in the slow dynamics of proteins
Hinsen, K; Kneller, GR Proteins (2008) 70 (4) 1235-1242

Protein dynamics from a NMR perspective: networks of coupled rotators and fractional brownian dynamics

Estimating the influence of finite instrumental resolution on elastic neutron scattering intensities from proteins

Projection formalism for constrained dynamical systems: From Newtonian to Hamiltonian mechanics

Relaxation dynamics of lysozyme in solution under pressure: Combining molecular dynamics simulations and quasielastic neutron scattering
Calandrini, V; Hamon, V; Hinsen, K; Calligari, P; Bellissent-Funel, M; Kneller, GR Chem. Phys. (2007)

Scaling laws and memory effects in the dynamics liquids and proteins
Kneller, GR. Hinsen; K. Sutmann; G.Calandrini, V Particles and nuclei Lett. (2007)
Efficient characterization of protein secondary structure in terms of screw motions

Hamiltonian formalism for semiflexible molecules in Cartesian coordinates

Role of effective atomic masses in memory function-based models for liquids: A simulation study of liquid water

Simulation studies of structural changes and relaxation processes in lysozyme under pressure

Comment on "Using quaternions to calculate RMSD" - [J. Comp. Chem. 25, 1849 (2004)]

Linear prediction of force time series to accelerate molecular dynamics simulations

Molecular simulations and their analysis

Quasielastic neutron scattering and relaxation processes in proteins: analytical and simulation-based models
Kneller, GR PCCP Phys. Chem. Ch. Ph. (2005) 7 (13) 2641-2655

Fractional Brownian dynamics in proteins

Lysozyme in solution under pressure
Kneller, GR; Bellissent-Funel, M; Hamon, V Institut Laue-Langevin (2004) 8-04-286

Scaling of the memory function and Brownian motion

Accelerating molecular dynamics simulations by linear prediction of time series
Mass and size effects on the memory function of tracer particles

nMoldyn: A program package for a neutron scattering oriented analysis of Molecular Dynamics simulations

Liquid-like and solid-like motions in proteins

Computing memory functions from molecular dynamics simulations

Reply to "Comment on 'Efficient stress relaxation in molecular dynamics simulations of semiflexible n-alkanes'"

Brownian dynamics simulations of electrolyte mixtures: computation of transport coefficients and comparison with an analytical transport theory

Dynamical properties of electrolyte solutions from Brownian dynamics simulations
Jardat, M; Bernard, O; Treiner, C; Kneller, GR; Turq, P J. Phys.-Paris IV (2000) 10 (P5) 113-116

Harmonicity in slow protein dynamics

Inelastic neutron scattering from damped collective vibrations of macromolecules

Projection methods for the analysis of complex motions in macromolecules
Hinsen, K; Kneller, GR Mol. Simulat. (2000) 23 (4-5) 275-292

The influence of molecular flexibility on DNA radiosensitivity: A simulation study
A simplified force field for describing vibrational protein dynamics over the whole frequency range

Dynamics of alkane chains included in an organic matrix: Molecular dynamics simulation and comparison with neutron scattering experiment
Morelon, ND; Kneller, GR; Ferrand, M; Grand, A; Smith, JC; Bee, M J. Chem. Phys. (1998) 109 (7) 2883-2894

Efficient stress relaxation in molecular dynamics simulations of semiflexible n-alkanes

Nose-Andersen dynamics of partially rigid molecules: Coupling all degrees of freedom to heat and pressure baths
Kneller, GR; Mulders, T Phys. Rev. E (1996) 54 (6) 6825-6837

Sedimentation of clusters of spheres 1. Unconstrained systems
Hinsen, K; Kneller, GR J. Mol. Model. (1996) 2 (9) 227-238

Sedimentation of clusters of spheres 2. Constrained systems

Influence of constraints on the dynamics of polypeptide-chains

nMoldyn - a program package for a neutron-scattering oriented analysis of molecular-dynamics simulations

Dynamics of pristine and doped polyacetylene - a combined inelastic neutron-scattering and computer-simulation analysis

Dynamics of sodium-doped polyacetylene
Generalized Euler equations for linked rigid bodies

Inelastic neutron-scattering from classical-systems stationary-phase approximation of the scattering law
Kneller, GR  Mol. Phys. (1994) 83 (1) 63-87

Liquid-like side-chain dynamics in myoglobin
Kneller, GR; Smith, JC  J. Mol. Biol. (1994) 242 (3) 181-185

Neutron scattering from classical systems: Stationary phase approximation of the
Methyl-group dynamics in the crystalline alanine dipeptide - a combined computer-simulation and inelastic neutron-scattering analysis
Kneller, GR; Doster, W; Settles, M; Cusack, S; Smith, JC  J. Chem. Phys. (1992) 97 (12) 8864-8879

Quaternions as a tool for the analysis of molecular-systems

Superposition of Molecular Structures using Quaternions

Torsional motions of methyl and ammonium groups in the l-alanine crystal: A comparison of molecular dynamics and normal mode calculations

Molecular-dynamics simulations of liquid water using the ncc abinitio potential
Niesar, U; Corongiu, G; Clementi, E; Kneller, GR; Bhattacharya, DK  J. Phys. Chem. (1990) 94 (20) 7949-7956

Molecular-dynamics studies and neutron-scattering experiments on methylene-chloride .2. Dynamics
Kneller, GR; Geiger, A  Mol. Phys. (1990) 70 (3) 465-483

MOTECC 1990 - Modern techniques in computational chemistry
Clementi, E; Corongiu, G; Aida, M; Niesar, U; Kneller, GR in Chapter Monte Carlo and molecular dynamics simulations (Ed. Clementi, E.. Escom, Leiden, The Netherlands) 805

Kneller, GR (1980)

A method to calculate the g-coefficients of the molecular pair correlation function from MD-simulations
Kneller, GR; Geiger, A  Mol. Simulat. (1989) 3 283-300

Molecular-dynamics studies and neutron-scattering experiments on methylene-chloride .1. Structure

Boundary-layer effects on the rate of diffusion-controlled reactions
Kneller, GR; Titulaer, UM  Physica A (1985) 129 (3) 514-534
Coupling of a BAF2-szintillator to a TMAE-photocathode in a low pressure wire chamber
Anderson, D; Bouclier, R; Charpak, G; Majewski, S; Kneller, GR  Atomnya Tekhnia Za Ruhbezhom (1985) 5 18-23

The covariant form of the Klein-Kramer equation and the associated moment equations
Kneller, GR; Titulaer, UM  Physica A (1984) 129 (1) 81-94

Coupling of a BAF2-szintillator to a TMAE-photocathode in a low pressure wire chamber
